Topics
ASE: Automotive and stationary emission control
ACC: Air cleaning and combustion
WT: Water treatment
SCE: Sustainable and clean energy production and transport
CEC: Catalysis to electrify the chemical production
GCB: Green chemistry and biomass transformation, renewable resources conversion
CE: Circular economy
CUR: CO ₂ utilization and recycling
HST: H ₂ storage and transportation, green H ₂ production, hydrogen vectors
PPA: Photocatalysis and photoelectrocatalytic approaches, solar energy utilization
APE: Advanced process with electrocatalysis and plasma utilization
FAU: Fundamental advances in understanding catalysis

Rooms
PR Plenary room (600p)
RM Room Massimo (200p)
RI Room Isole (180p)
CH Hallway (posters)

Due to the many requests for changes in the day of the presentation, the topics are only indicative. On the other hand, the conference favours **cross-fertilisation** among the different areas of environmental catalysis.
